When the installation completion screen appears, click [Close]. Clip Studio Modeler has now been installed successfully.

If other Clip Studio series applications have not been installed, Clip Studio will be installed as well as Clip Studio Modeler. For details about Clip Studio, see "[About Clip Studio](#)".

About Clip Studio

When a Clip Studio series application is installed, .Clip Studio is installed at the same time. Clip Studio is a convenient application that controls the software for the Clip Studio series. You can launch Clip Studio Modeler and manage materials from within Clip Studio.

Start Clip Studio Modeler

Follow these steps to start Clip Studio Modeler. This section uses Windows screens for the description, but the procedure is similar on macOS.

1 Start Clip Studio

Double-click the Clip Studio application icon on the desktop.

- Clip Studio Modeler materials will be automatically downloaded when Clip Studio is first launched.
- If a material is larger than 250KB, only the thumbnail will be downloaded. These materials will be downloaded when you use them in Clip Studio Modeler.

2 Start Clip Studio Modeler

After launching Clip Studio, click [MODELER].

3 Start Clip Studio Modeler

The [New] dialog box will appear. Choose between [3D object] and [3D character], select [Create (selected item)] and Clip Studio Modeler will open.

Uninstalling the Application

Follow these steps if you need to uninstall the application.

Deleting the Application

This explains how to uninstall Clip Studio Modeler.

When you are using Windows 10

Select Windows [Start] button > [Settings] > [Application] or [System] > [CLIP STUDIO PAINT 1.X.X] and click the [Uninstall] button.

When you are using Windows 8

Display the desktop and place the mouse cursor on the right upper corner of the screen. Select [Settings] > [Control Panel] > [Programs] > [Programs and Features] > [CLIP STUDIO MODELER 1.X.X] and click [Uninstall] button.

When you are using Windows 7

Select Windows [Start] button > [Control Panel] > [Programs] > [Programs and Features] > [CLIP STUDIO 1.X.X] and click [Uninstall] button.

When you are using macOS

On the hard disk where CLIP STUDIO MODELER is installed, select [Application] folder > [CLIP STUDIO 1.5] and delete the following folders and files.

To delete Clip Studio Modeler:

[App] > [CLIP STUDIO MODELER]

Deleting Clip Studio

If all Clip Studio series applications are deleted, Clip Studio will also be deleted.

If Clip Studio is deleted, you cannot use Clip Studio Modeler or other Clip Studio series applications. Before deleting Clip Studio, confirm that all other Clip Studio series applications have been deleted.

When you are using Windows 10

Select Windows [Start] button > [Settings] > [Application] or [System] > [CLIP STUDIO PAINT 1.X.X] and click the [Uninstall] button.

When you are using Windows 8

On the desktop, move the mouse cursor to the upper right corner of the screen. Select [Settings] > [Control Panel] > [Programs] > [Programs and Features] > [CLIP STUDIO 1.X.X] and click the [Uninstall] button.

When you are using Windows 7

Select Windows [Start] button > [Control Panel] > [Programs] > [Programs and Features] > [CLIP STUDIO 1.X.X] and click the [Uninstall] button.

When you are using macOS

Delete the following folders and files from [Application] > [CLIP STUDIO 1.5] folder.

To delete Clip Studio:

[CLIP STUDIO]

[Settings] > [CLIP STUDIO]

To delete the material uninstaller:

[Material uninstall]
